**Khaya  
Power  
(Pty) Ltd**

<b>Project</b>	Efficient and Safe Micro-Gasifier Stove
<b>Company Address</b>	11 Distillery Road, Stellenbosch, 7600
<b>Website / Email</b>	<a href="http://www.khayapower.co.za">www.khayapower.co.za</a>
<b>Formation Date</b>	February 2013
<b>Technology Category</b>	Renewable Energy
<b>Company Summary</b>	KHAYA POWER is a clean-power technology company with a purpose to directly impact the lives of its customers and partners with their solutions through: making a difference to households in developing countries who have inadequate, unreliable or no access to grid supplied power, by introducing smart technologies appropriate to the markets needs and partnering with local businesses in each region.
<b>Technology Abstract</b>	A micro-gasifier stove with an electrically driven fan, which is a smoke free and burns biomass efficiently.
<b>Technology Development</b>	<p><b>Current Stage:</b> Pilot Testing - the company piloted early versions of the stoves in 4 townships in the Western and Eastern Cape in 2014. The experiences have been documented and used for refining the technology.</p> <p>Five rounds of prototyping have been done and the company is ironing out the last volume manufacturing issues.</p>
<b>Financial Needs</b>	The company needs funding for working capital requirements of the manufacturing and distributors.
<b>Intellectual Property</b>	<b>South Africa - 2014/08267 Pending</b>
